

Irina Kostina. Software Developer

Auckland, New Zealand | NZ Resident

[Portfolio](#) | [GitHub](#) | [LinkedIn](#) | irina.kostina.nz@gmail.com | 021-512294

Professional Summary: I'm a software developer who builds web applications with React, Node.js, JavaScript, and TypeScript. I'm looking for a challenging role in a highly collaborative team. I moved into tech after 7 years in accounting because I love learning and wanted a field where I can keep growing, experimenting, and turning ideas into real applications. After completing my studies and building several full-stack projects, I finally made this step I had dreamt of for many years. I love tech because it lets me be creative, solve problems, and build apps people can use.

In my latest project, my teammates and I created an app that helps to track lost pets and reunite animals with their owners. Now I'm building [a budgeting app](#) that tracks expenses and shows spending insights, inspired by my interest in personal finance. I bring clear communication, teamwork, and a focus on clean, maintainable code. My colleagues describe me as curious, eager to learn, easy to work with, and interested in technology that improves both work and daily life.

SKILLS

Technical Skills

Frontend: HTML, CSS, JavaScript, TypeScript, React, Vite, Tailwind CSS, Responsive Design, Accessibility

Backend & Databases: Node.js, Express.js, REST API design, Auth0, PostgreSQL, SQLite, Knex.js (migrations, seeds)

Tools & Workflow: Git, GitHub, Postman, Thunder Client, Agile practices, AI-assisted development (ChatGPT, Cursor)

Professional Skills

Problem-solving · Clear communication · Team collaboration · Analytical thinking · Adaptability · Fast learner · Attention to detail

PROJECTS

TailTrail - Lost & Found Pets Web App (private repo)

React, Node.js, Express, TypeScript, PostgreSQL, SQLite, Auth0, Google Maps API, TailwindCSS

- Final group project at Dev Academy, built collaboratively in a team of 4
- Developed a full-stack web application to help reunite lost pets with their owners, featuring reporting, tracking, and browsing of lost/found pets, with interactive Google Maps for sightings and Auth0 authentication for secure user login and case management
- **Key contributions:** Built backend API endpoints to fetch pet data and integrated them with the frontend, while also styling the responsive UI with TailwindCSS (forms, filters, and pet listings)

E-Commerce Cake Shop Web App (GitHub: [Code](#))

React, Node.js, Express, TypeScript, PostgreSQL, Knex.js, Auth0

- Built a full-stack e-commerce application for browsing, customising, and ordering handcrafted cakes
- Implemented secure authentication with Auth0 for user login and personalised shopping experience
- Designed and managed PostgreSQL database with Knex.js migrations and seeds for cake data
- Developed responsive frontend with React, including dynamic cart, checkout flow, and product detail pages

Finance Tracker – Budgeting App (GitHub: [Code](#))

React, Express.js, TypeScript, PostgreSQL

- Built a full-stack expense tracking application with React, Node.js/Express, TypeScript, PostgreSQL, and Knex.js, enabling users to record expenses and view insights through interactive dashboards.

- Designed PostgreSQL schema and developed REST API endpoints with Knex.js for expense tracking and reporting

PROFESSIONAL EXPERIENCE

DEV ACADEMY AOTEAROA – Auckland, New Zealand

ROLE: Student | DATES: Jun 2025 – Oct 2025

- Completed an intensive 17-week full-stack web development bootcamp focused on **JavaScript, TypeScript, React, Node.js, Express, and PostgreSQL**
- Built full-stack applications with **REST APIs, database migrations/seeds, and secure user authentication (Auth0)**, applying **Agile** practices and **Git/GitHub** workflows
- Collaborated in diverse teams to deliver projects under tight deadlines, demonstrating adaptability, clear communication, and problem-solving

METLIFECARE – Auckland, New Zealand

ROLE: Accounts Payable Officer (Contract) | DATES: Dec 2024 – Jun 2025

- Supported efficient invoice processing and reconciliations, applying accuracy, problem-solving, and process improvement skills
- Handled supplier queries and maintained clear financial records in line with company procedures

SAFARI GROUP – Auckland, New Zealand

ROLE: Accounts Technician (Contract) | DATES: Jul 2023 – Jul 2024

- Managed reconciliations and reporting, ensuring accuracy, compliance, and clear communication with stakeholders
- Assisted with GST/IRD filings and payroll tax submissions, demonstrating analytical and organisational skills.

EARLIER ROLES IN ACCOUNTING & FINANCE – Moscow, Russia

ROLE: Various Positions | DATES: 2017 – 2023

- Roles included Accountant and Finance Analyst across logistics and software companies.
- Focused on financial reporting, process automation, and data-driven decision support

EDUCATION

- **Dev Academy Aotearoa** - Auckland, NZ Oct 2025
Completed an intensive Full Stack Web Development bootcamp, mastering modern web technologies and agile team practices
- **Postgraduate Diploma in Business Administration** – Auckland Institute of Studies – Auckland, NZ May 2024
Completed a Business Administration curriculum, mastering business and analysis subjects.
- **Bachelor of Finance** – Moscow State University of Railway Engineering – Moscow, Russia Feb 2015
Completed a Finance curriculum, mastering key finance and accounting subjects and developing strong analytical skills.

Certificates

- **Codecademy – Full-Stack Engineer Career Path** (*in progress*)
- **FreeCodeCamp – Responsive Web Design** (Jun 2025)
- **Google Agile Project Management** (Sep 2024)
- **Microsoft Power BI Data Analyst** (Mar 2024)
